EXPERIENCE

COSYSENSE, U.K, REMOTE

Lead Frontend Engineer – *March 2024 – Nov 2024*

Led the full implementation lifecycle of a single-page application (SPA) for a startup focused on sustainability in air conditioning systems.

- Gathered requirements for the frontend application; planned, estimated, and executed the entire development cycle.
- Designed and implemented a UI prototype, iterating based on feedback from the founders and a third-party designer.
- Designed and built the frontend and part of the backend architecture to support user authentication and integration with sensor APIs.
- Set up a development environment with tooling to enhance developer experience.
- Deployed the application using AWS, including CDN configuration, HTTPS setup, and analytics integration.
- Wrote documentation to help stakeholders create and manage user accounts within the platform.

SPLIT SOFTWARE, TANDIL, ARGENTINA

Senior Frontend Engineer – *June 2019 – June 2023*

Led feature development and helped shape frontend processes for Split's feature flagging platform.

- Planned and delivered multiple frontend features, collaborating with designers and cross-functional teams.
- Documented technical decisions to improve internal knowledge sharing.
- Researched, selected, and introduced a modern automated testing library to improve testing reliability and coverage.
- Contributed to defining team-wide frontend best practices and promoted their consistent use.
- Participated in hiring, leading technical interviews and onboarding processes.
- Supported new team members to help them integrate effectively.
- Helped improving the BFF (Back-End for Front-End) layer using Hapi.js and GraphQL to enhance data flow and reduce dependencies with backend services.
- Participated in on-call rotations to quickly resolve high-priority, customer-facing issues.

Frontend Engineer – *August 2016 – June 2019*

Founding member of the frontend team during the company's early growth phase.

- Worked closely with founders to shape the product's frontend strategy.
- Implemented foundational UI features and testing frameworks.
- Helped establish the company's culture in the newly opened Tandil office.

GLOBANT, TANDIL, ARGENTINA

Semi-Senior Frontend Engineer – *May 2012 – August 2016*

Began my frontend engineering career at a multinational software factory, progressing from trainee to Semi-Senior role. Contributed to several international web application projects across various industries.

- Developed responsive web interfaces using early JavaScript frameworks such as jQuery, Backbone, and AngularJS.
- Worked directly with major US-based clients including Cisco, Intuit, PwC, Humana and others.
- Participated in full project cycles—from proof of concept to implementation and deployment—delivering features in high-impact client applications.

EDUCATION

UNIVERSIDAD NACIONAL DEL CENTRO DE LA PROVINCIA DE BUENOS AIRES, TANDIL,
ARGENTINA - 2006 - 2012

BACHELOR'S DEGREE (FINISHED ALL SUBJECTS, THESIS PENDING).

TECHNICAL DEGREE (2010).
